Best Review Award, 1996/1997

Knowledgeable peer reviews of submitted manuscripts are a key element (arguably, *the* key element) in maintaining the high quality of a research journal, such as ours. In recognition of the important role played by our reviewers, we have established a "Best Review Award", selected for this year from among reviews received between November 1, 1996 and October 31, 1997.

The vast majority of the reviews we receive are very helpful, both to the editors and the authors. The "Best Review Award" is for one which has been rated by the editors as being outstanding in terms of the detailed nature of the constructive assessment of both the scientific strengths and weaknesses of the manuscript, and the provision of helpful, specific suggestions for improvement of the scientific/engineering content. Prompt provision of the review also is considered favourably.

We are pleased to announce that this year's recipient of the "Best Review Award" is Dr. Marten Ternan, NRC, Energy Diversification Research Laboratory, Varennes, Quebec. By way of appreciation, he will receive a complimentary subscription to *The Canadian Journal of Chemical Engineering* for 1998.

Pierre J. Carreau
Editor
